f. Management's perception of risk factors:

The Company has been in the consumer durables segment for more than 100 years and enjoys a strong brand image and recall with its customers. This segment faces intense price competition and volatility in commodity & exchange rates. Management believes that growth in consumer segment will remain moderate over the medium term, given the slowdown in consumer demand and high interest rates. Growth in industrial segment has improved with the large industrial clients increasing their investment gradually as the economic scenario improves. This would favourably impact the profitability in long run, further, the management believes that Company's cash accruals will remain healthy over the medium term, driven by its diversified revenue profile and increasing contribution of stable lease rental, supported by comfortable gearing and debt protection metrics. Further, its healthy listed equity portfolio and valuable real estate holding will continue to support its strong financial flexibility.
